## Fisheries

Primary specie- Northern Pike  
 Secondary specie- Largemouth Bass, Bluegills,  
 Black Crappies

Crappies

## Water Quality Assurance

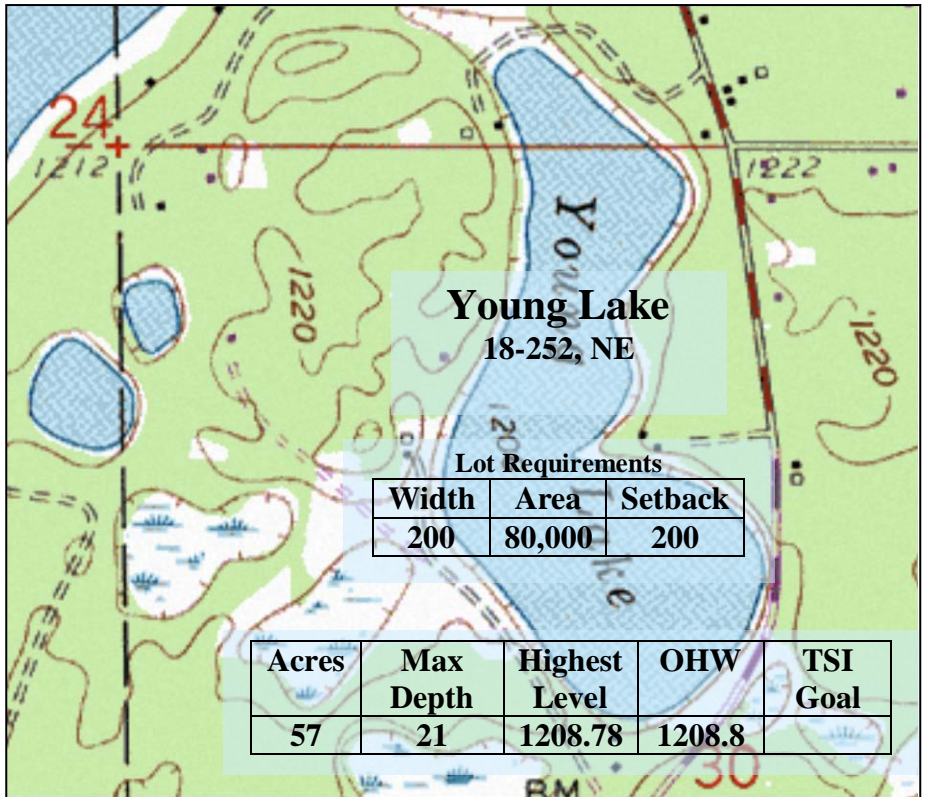

Current TSI Goal: Not Established  
 Current 2001 TSI: 45

## Water Quality Summary

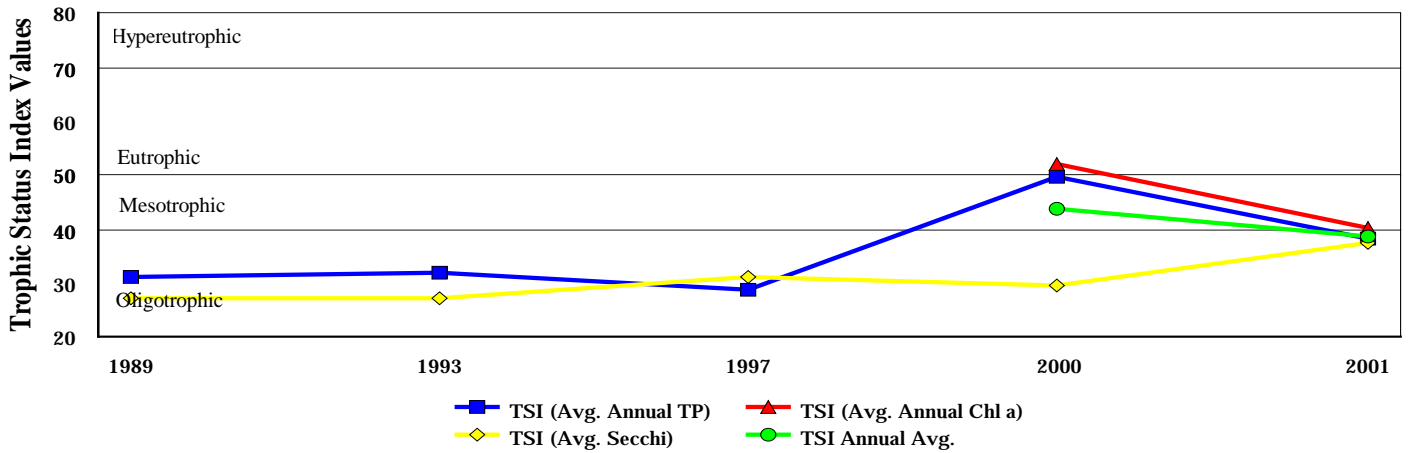

Synopsis:  
 Young Lake's TSI goal has not been established. The average TSI value observed through 2001 is 45. Young Lake exhibited eutrophic tendencies in 2000 and in June of 2001. However, during the low or no rainfall months (July and August 2001) the eutrophic tendencies subsided.

## Management Strategy:

1. Enhance lake monitoring and continue the yearly overflights.
2. Develop storm and wastewater management plans.
3. Conduct a Werring Procedure.

## Young Lake

## Young Lake (ID# 18-252)
