

## Clark Lake

### Fisheries

Primary specie- Northern Pike, Walleye  
 Secondary specie- Bluegill, Black Crappie

### Water Quality Assurance

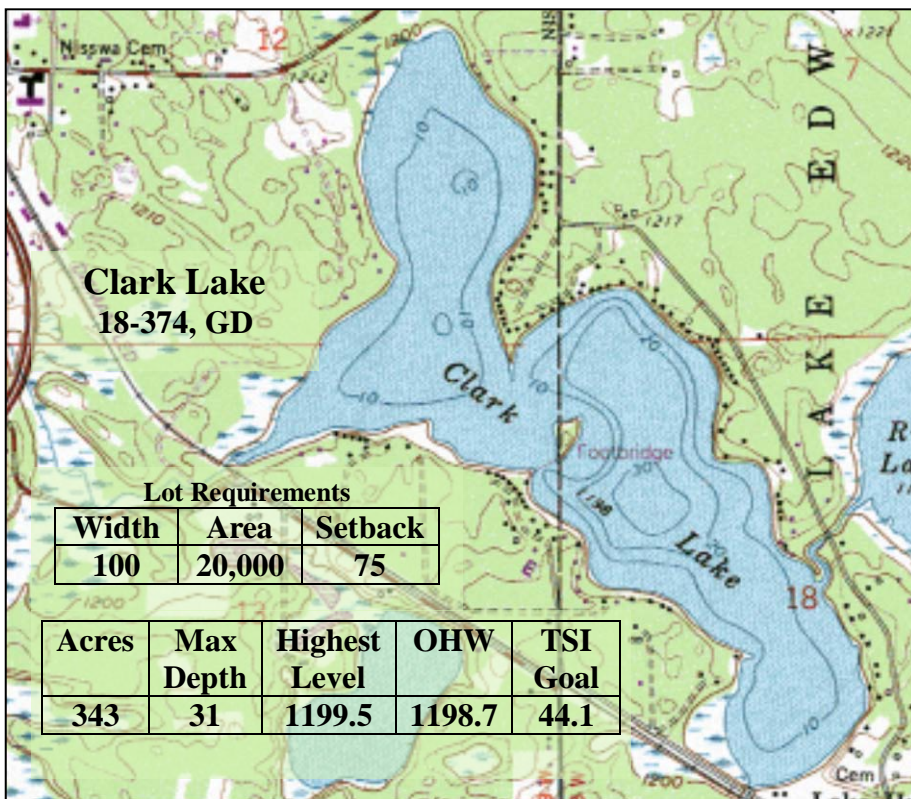

Current TSI Goal: 44.1 or less  
 Current 2001 TSI: 43.9

### Water Quality Summary

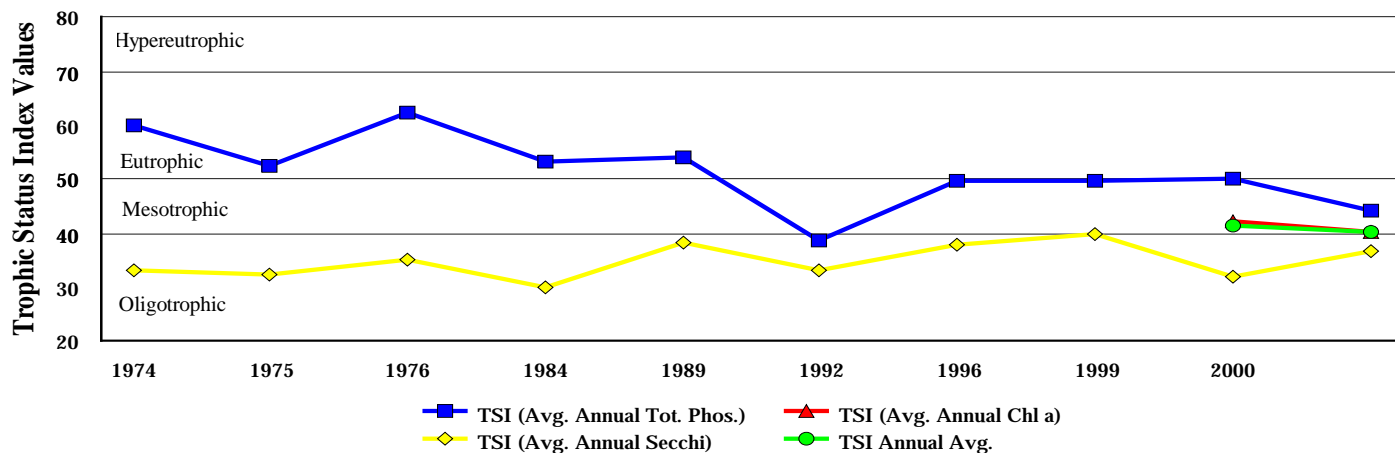

Synopsis:  
 Clark Lake has a TSI goal of 44.1 or less. The average TSI value through 2001 is 43.9. The Lake has exceeded the TSI goal during August of 2000 and 2001. This may indicate increasing nutrient loading during the summer months due to septic system contribution

### Management Strategy:

1. Maintain the inlet and outlet structures
2. Conduct yearly mass balance measurements for volume, Tp, Tss
3. Develop and implement a waste water management plan
4. Conduct a Werring Procedure
5. Continue lake monitoring

## Clark Lake

Clark Lake (ID# 18-374)
