

Gladstone Lake

Fisheries

Primary specie- Northern Pike, Lm Bass
 Secondary specie- Bluegills, Black Crappies

Water Quality Assurance

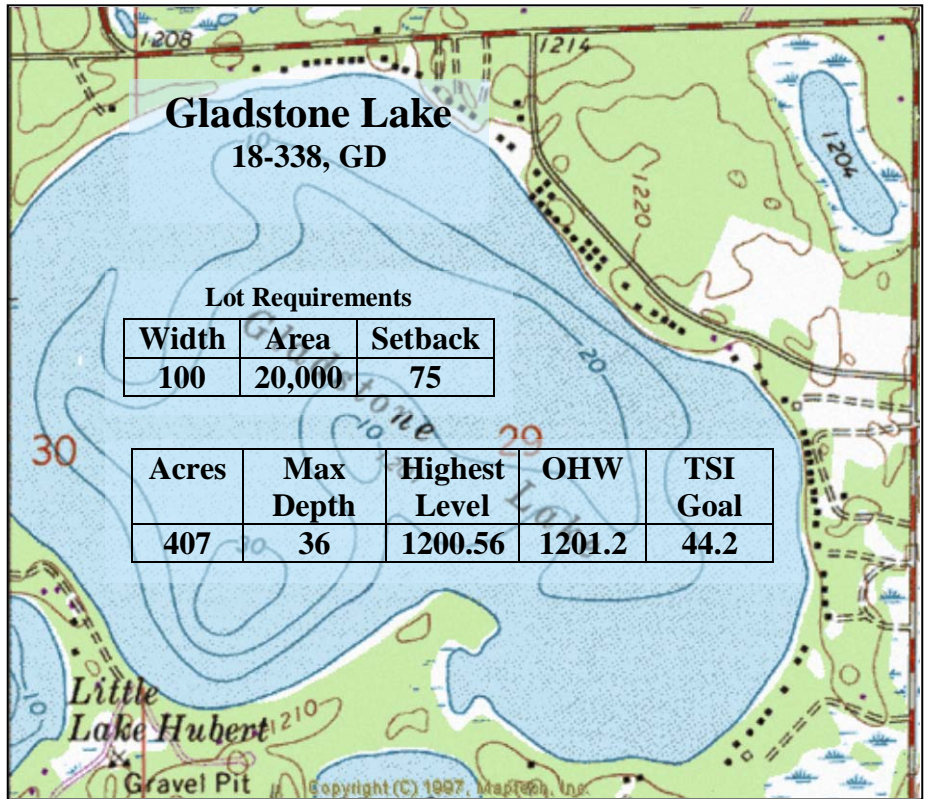

Current TSI Goal: 44.2 or less
 Current 2001 TSI: 40.3

Water Quality Summary

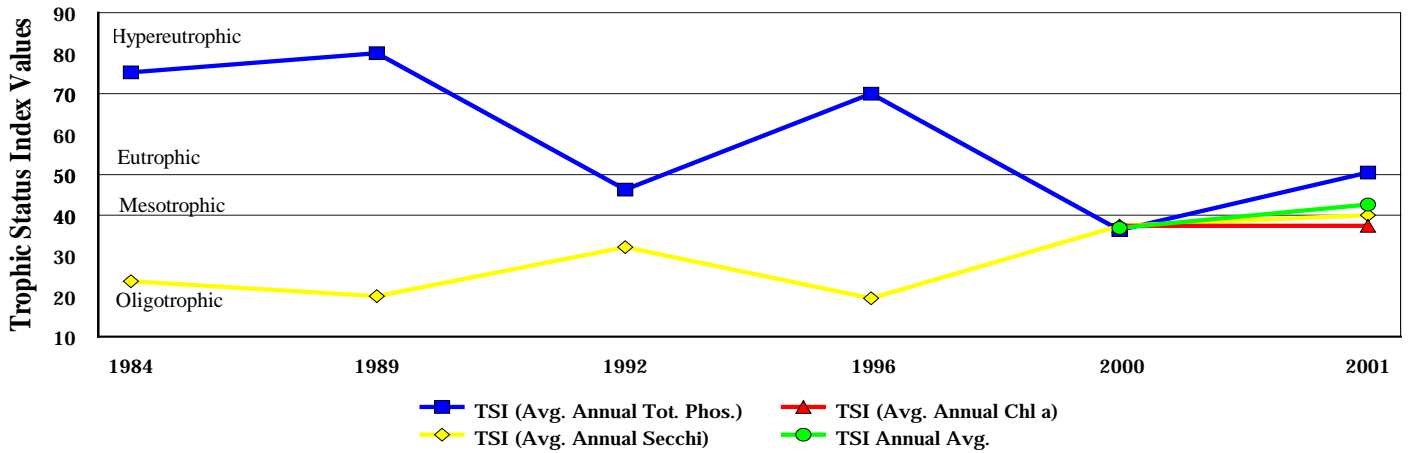

Synopsis:
 Gladstone Lake has a TSI goal of 44.2 or less. The average TSI goal through 2001 is 40.3. The lake has exhibited individual TSI indicators below the goal with the exception of the August 2001 sample. The phosphorus concentration of this sample resulted in a TSI value of 60.8.

Management Strategy:

1. Continue lake monitoring and yearly overflights
2. Establish a dialogue with the Gladstone Lake Association
3. Conduct a Werring Procedure.

Gladstone Lake

Garden Lake (ID# 18-338)
